

Company Profile

Integrated Logistics Solutions

Ocean Freight • Air Freight
Road Transport • Customs Clearance Support

We coordinate your shipment from origin to destination with clarity and flexibility.

About Us

One clear process for every stage of the shipment

SAL develops logistics solutions around the cargo, destination, and required schedule. We coordinate ocean, air, and road transport while supporting customs clearance requirements from initial review through delivery and follow-up.

Our Vision

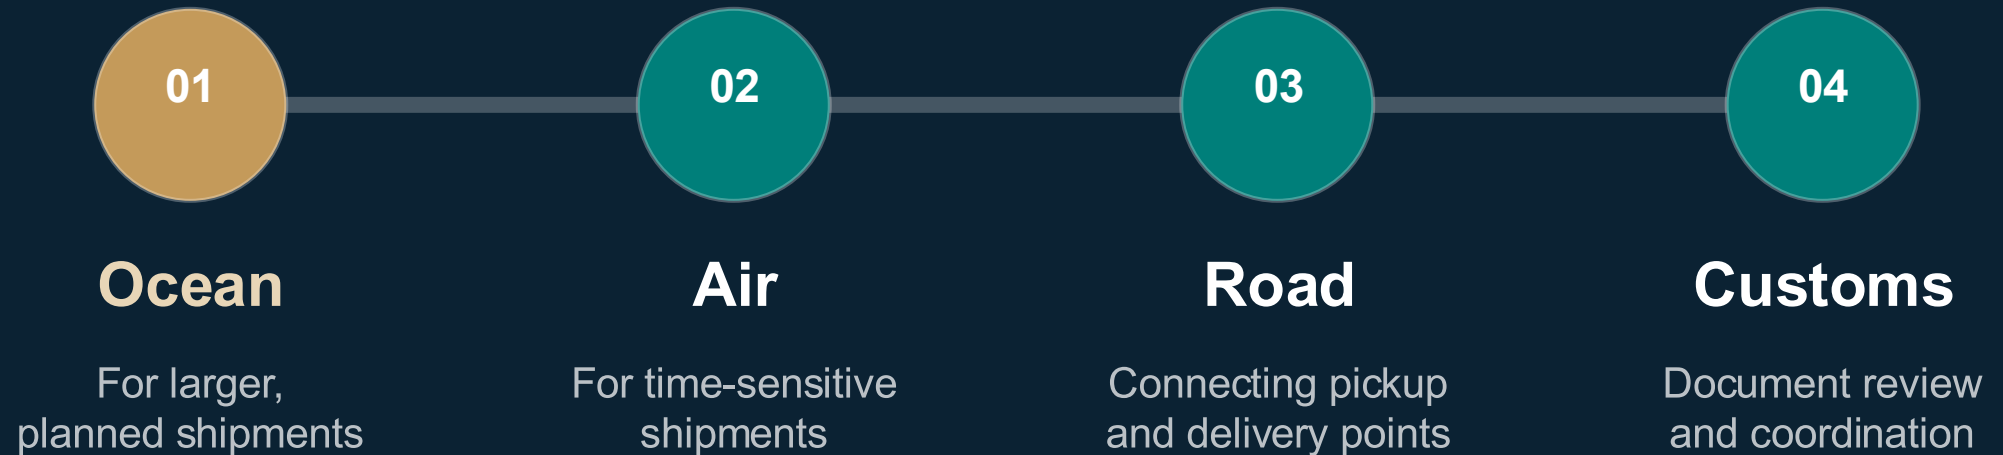

To be a trusted choice for companies seeking clear and flexible logistics coordination.

Clarity • Flexibility • Follow-up

Integrated Services for Every Shipment

We review the cargo, destination, schedule, and budget before defining the appropriate mode and service scope.

Final scope is confirmed after reviewing operational needs, regulatory requirements, and carrier availability.

FLEXIBLE OPTIONS ACROSS SHIPMENT SIZES AND ROUTES

Ocean Freight

We coordinate ocean freight based on shipment size, route, and the available schedule, following each key stage from booking through arrival.

- Full-container or LCL options, subject to route and availability
- Pickup and delivery coordination to and from the port
- Shipping document and sailing schedule follow-up
- Connection to road transport when required

WHEN TIME IS A KEY FACTOR

Air Freight

We coordinate air freight for shipments requiring shorter transit times and close follow-up, taking weight, dimensions, priority, and carrier acceptance into account.

- An option matched to shipment priority and size
- Booking, pickup, and delivery coordination
- Review of documentation and packaging requirements
- Connection to road transport and customs support

Special or restricted cargo is subject to carrier approval and applicable regulations.

PRACTICAL LINKS BETWEEN PICKUP AND DELIVERY POINTS

Road Transport

We coordinate road transport between customer sites, ports, airports, and delivery points based on shipment size, route, and the agreed schedule.

- Full or partial loads based on need
- Transport within and between cities
- Suitable vehicle selection through the service provider
- Pickup, delivery, and Proof of Delivery follow-up

DOCUMENT AND PROCESS COORDINATION

Customs Clearance

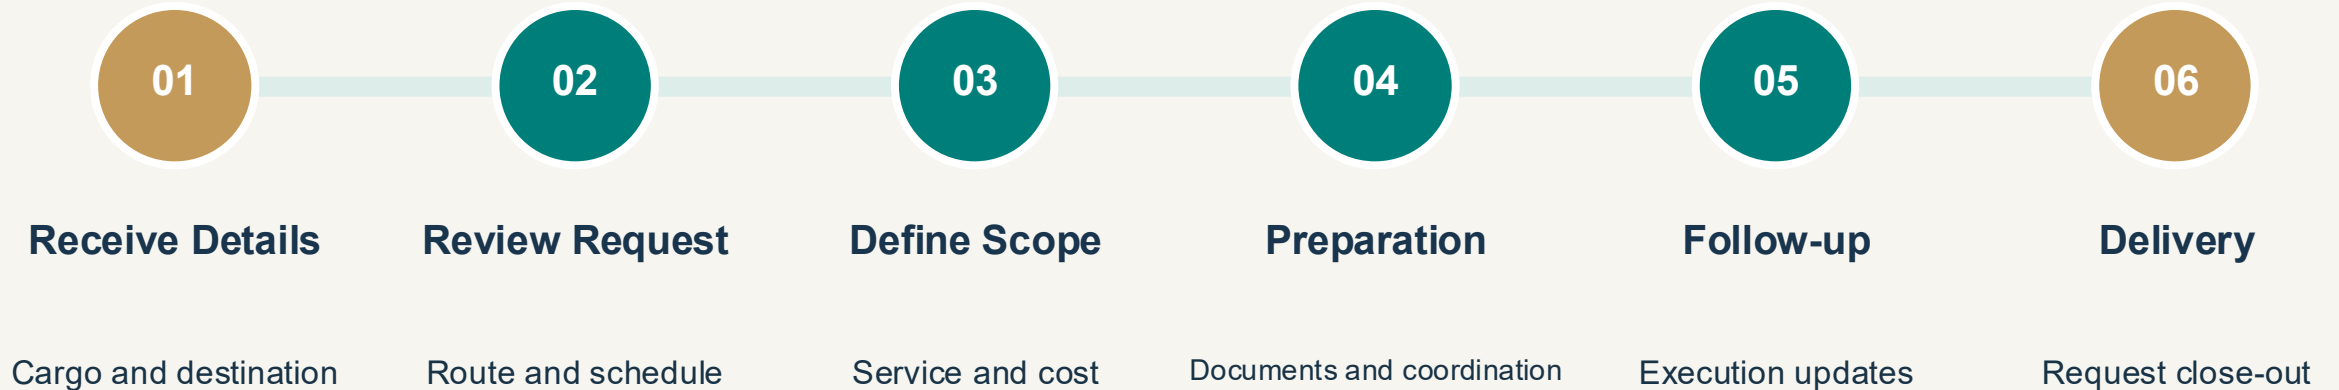

We support customs clearance requirements through an initial document review and coordination with specialist service providers and relevant authorities.

- Review of the invoice, packing list, and certificate of origin
- Additional requirements identified by cargo type
- Customer follow-up on queries and fees
- Delivery coordination after customs release

Licensed activities are handled through a qualified provider. Timing depends on complete documents and authority procedures.

From Request to Delivery

Clear steps define responsibilities and make execution easier to follow.

What We Focus On

Clear coordination • Shipment-specific solutions • Transparent scope • Updates through delivery

Let's Start with Your Shipment Details

Share the cargo type, pickup point, destination, weight, dimensions, and required timing. The SAL team will review the request and propose an appropriate service scope.
